American Society Of Ocularists

Aspiring Ocularist

Dear Board Approved Diplomates of the American Society of Ocularists,

As a recent Bachelor of Science graduate, I am driven to pursue this field with my interest of becoming an intern and member with the American Board of Ocularists. I have profound knowledge in biology, chemistry, physics, and psychology, along with the necessary qualifications which are required to make a positive impact in this role, and more importantly with clients.

The question lies why I chose to pursue this path–a simple answer remains–that the role of an Ocularist is best tailored to my aspirations and I undoubtedly am capable of success. I offer a combination of unique skills and competencies which I have developed through my years of education and challenging myself in new professional roles.

As my resume indicates, I offer the ability to provide excellent patient care, approach obstacles with caution and precision, and effectively collaborate with peers to reach the best results possible. I am most eager to begin this new chapter of my educational and professional career, and to continue exceeding expectations.

Please feel free to contact me for any questions about my qualifications or experience. I would welcome the opportunity to discuss possible next steps. Thank you for your consideration.

Sincerely,
Kayla Grover
